

behind closed doors

Creating and maintaining a beautiful yet practical bathroom is a bit of a balancing act but incorporating plenty of storage space into your design is an excellent starting point.

Given the number of items we regularly use in the bathroom, you need to ensure that everything has a home. It may well be that you want to display certain items but what about dirty washing or even the loo roll? Utopia offers a single base unit with an internal wire linen basket. Ideal for avoiding the horror of stray socks on the floor, the drop down basket can simply be lifted out when full.

There is also a concealed tissue roll unit which keeps the roll conveniently to hand but discreetly out of sight. For those who like to keep cleaning materials in the bathroom, a contoured unit may be the perfect answer as it offers masses of space including full height storage for taller items.

Visit www.utopiagroup.com or call 0800 288 8410 for further information on Utopia's comprehensive range of bathroom furniture.
