Clever ways with solid surfacing

Beautiful, durable, seamless - solid surfacing adds the perfect finishing touch to your bathroom. This unique, manmade material looks like granite but is lighter and much more versatile.

It's the perfect choice for bathroom worksurfaces as it is extremely hardwearing, easy to care for and looks sensational. As solid surfacing is made to order, you can have whatever size or shape you like, including curves, and it will be made to your exact dimensions without any seams or joins. Even better, solid surfacing can be combined with either an inset or semi-countertop basin for a really luxurious, seamless look in your bathroom. You can also use it for shelves, splashbacks and windowsills for a fully co-ordinated look.

Choose from Utopia's Classic range for a subtle effect and from the Statement collection for a bolder, more pronounced pattern. Visit www.utopiagroup.com or call 0800 288 8410 for further information.
