

UTOPIA INTRODUCES SLIDING MIRROR CABINET

Utopia has launched a new sliding mirror cabinet with LED spotlights to complement both its new Timber Collection and the popular YOU™ modular range. Marking Utopia's first venture into LED lighting, the cabinet has four spotlights, two positioned to give specific focus on the display shelving areas and two to focus on the large mirror which glides smoothly to either side to reveal concealed shelving behind.

Helen Bray, Utopia's Marketing Director, comments, "As natural light is often limited in bathrooms, lighting is a particularly important element of bathroom design and we aim to offer the widest range of solutions. The new sliding mirror cabinet combines storage, a large mirror and focused, energy efficient lighting in a highly functional and very attractive unit."

Available in 1200mm and 1600mm widths, the new cabinet is available in Walnut and Golden Oak.
